

ALPINE SKIING HISTORY

Origin of Alpine Skiing

- The earliest skis were bones from large animals, strapped to the feet with leather thongs, like snowshoes. A pair of such runners, judged to be nearly 5,000 years old, is on display in the Djuggaarden Museum in Stockholm.
- It is believed that skis were first used in warfare during the Battle of Oslo in 1200, when King SVERRE of Norway equipped his scouts with skis and sent them on spy missions against Norwegian foes.
- Skiing was introduced in central Europe via Austria in 1590, and the sport then spread to North America, Asia and Australia.
- It was the Norwegians who first treated skiing as a competitive sport.
- In 1860, the King of Norway awarded a trophy to the winner of an Alpine Skiing contest held near Oslo, Norway, and subsequently named a committee to draft rules for annual tournaments.
- While Norway is regarded as the cradle of skiing, the origins of competition Alpine Skiing can be found in the Alps of central Europe, where the modern Alpine Skiing technique began to develop at the beginning of the 20th century.
- The first international competition was organised by Britain's Sir Arnold LUNN in the late 1920s, and in 1931 the first FIS World Championships took place in Murren, Switzerland.
- The development of Alpine Skiing continued with the first competitions in Germany taking place in 1879 and with the forming of the first Swiss club in 1893 at Glaris by Christoph ISELIN.
- National ski federations appeared in Russia in 1896, Czechoslovakia in 1903, the USA in 1904, Austria and Germany in 1905 and Norway, Finland and Sweden in 1908.
- From 1910-24, an international skiing commission strove to monitor the development of competitive skiing throughout the world.
- In 1924, at a congress that took place during the first Olympic Winter Games in Chamonix, France, this commission gave birth to the International Ski Federation (FIS).

Alpine Skiing for the disabled

- Following World War II, there were hundreds of young men across Europe, particularly Austria and Germany, with amputated limbs, many of whom were good skiers before suffering their injuries.
- Not willing to give up the sport, above knee amputees tried skiing with three skis, one normal ski on the remaining leg and two short skis attached to crutches. This was the birth of disabled skiing.
- In 1942, German Franz WENDL, who was injured in the war, was the first disabled person to participate in a ski competition with basic, self-constructed outriggers - a forearm crutch.
- It wasn't until shortly after World War II that disabled skiing began to develop and in 1948 the first workshops for disabled skiers were opened up.
- From that point on the development and technique of disabled skiing progressed quickly.
- The war amputees were soon joined by the victims of other accidents, as well as those with disabilities caused by illness. Besides war amputees, there were people who were blinded or seriously visually impaired in the war.
- The earliest major competitions for disabled skiers were held in 1948. The first in Wendelstein, Germany, for 70 competitors, shortly followed by a Slalom race for outrigger skiers in Bad Gastein, Austria.
- The first documented championships for the disabled were held in Bad Gastein in 1948, with 17 disabled athletes participating.
- In 1949, the first World Winter Games for the deaf was organised in Austria.
- By the end of the 1940s, the Austrian Ski Association had organised a department for the disabled and in 1960 Austrian equipment was used for the first time for outrigger skiing in the USA.
- Up until the start of the 1970s, only amputees and visually impaired people, despite their disabilities, practised the sport of skiing.
- At this time interest in the sport began to grow amongst people who used wheelchairs - paraplegic and two-legged amputees. However, the first ski sleds constructed with two skis proved to be prone to accidents.
- In 1970, Widar JOHNSON created a plastic seat that enabled him to move in wintertime and play Ice Hockey and enjoy Cross Country skiing.
- The first Norwegian championships for visually impaired skiers was held in 1972.
- That same year, the first unofficial world games for outrigger skiers was held in Courcheval, France.
- In 1974, the first official World Championships for the Disabled were held in Grand Bornand, France.
- In 1980 in Japan, a chair ski association created the basis for the modern mono-ski. The introduction of the mono-ski facilitated the breakthrough for those who used wheelchairs.
- These so-called skibobs consist of a spring-loaded Kevlar seat, mounted with a binding to a conventional ski. The athlete can ski with the skibob, using two short ski riggers and shifting their balance.
- In recent years, the adjustable suspension for mono-skis has caused a technical revolution.

Alpine Skiing today

- Today technology plays an important part in disabled skiing. Modern, below-the-knee prostheses permit the experience of skiing to become almost normal for some disabled people, whereas for others it is still an adventure with considerable risk.
- The ski-crutches (outriggers) are now hollowed out and mono-skis have recently acquired adjustable springs that have revolutionised the technique.
- Racing techniques have been continuously refined over the years and further improved by talented skiers.
- Today, it is possible for a disabled skier to confidently and elegantly descend a slope, or to expertly participate in a Slalom race between the gates.
- Since 1982, the World Alpine Ski Championships for the Disabled have taken place between the Paralympic Winter Games.
- Embraced in Austria where the 1984 and 1988 World Championships took place in Innsbruck, and the 1996 World Championships in Lech, disabled skiing has reached extraordinary levels in popularity.
- Alpine Skiing is currently practised by athletes in 35 countries and is steadily growing.

Alpine Skiing at the Paralympic Winter Games

- In 1948, the English neurologist Sir Ludwig GUTTMANN organised the Stoke-Mandeville Wheelchair Games, parallel to the Olympic Summer Games in England, and so laid the foundation for the Paralympics.
- Since 1950 disabled skiing has been practised worldwide. The first official Paralympic Summer Games took place in Rome, Italy, in 1960.
- However, it wasn't until 16 years later, in 1976, that the first Paralympic Winter Games were held in Ornskodsvik, Sweden.
- On the official programme of the first Paralympics were Slalom and Giant Slalom, three distances in Nordic Skiing and relays for both visually-impaired athletes and athletes with a severe disability.
- In 1982, various organisations for the disabled established the International Coordinating Committee (ICC), which, from then on, coordinated the already existing Paralympic Games.
- Downhill was added to the Paralympic programme in 1984 in Innsbruck, Austria.
- The Paralympic Winter Games have been held in the same location as the Olympic Winter Games since the Albertville 1992 Olympic Winter Games in France.
- At the Lillehammer 1994 Paralympic Winter Games in Norway, where Super-G was added, the disabled athletes stayed in the Olympic Village and could benefit, for the first time, from the same infrastructure as the Olympic athletes and were able to profit from sponsorships.
- Since 1976, participation at the Paralympic Winter Games has climbed from 350 athletes from 18 countries to 1,200 participants from 32 countries at the Nagano 1998 Paralympic Winter Games in Japan.

Alpine Skiing for the disabled in Italy

- Alpine Skiing in Italy dates back to the early 1980s when Maurizio CAGOL (ITA), an amputee skier, started training on his own with the objective of participating in the Paralympics.
- The 1980 World Winter Games for the Disabled in Geilo, Norway, was the first competition to see an Italian disabled athlete competing.
- Since then this discipline has slowly developed across the Italian Alps, primarily in the mountain region of Trentino Alto Adige in north-east Italy.
- The first Italian Paralympic successes were achieved by skiers with sight disabilities.
- At the Innsbruck 1984 Paralympic Winter Games in Austria, the first in which Italy managed to enter a team, Bruno OBERHAMMER (ITA) won a silver in the Slalom and a bronze in the Combined.
- OBERHAMMER still holds the Italian record for Paralympic participation and number of medals won. Competing in five Paralympic Games between the Innsbruck 1984 Paralympic Games and the Nagano 1998 Paralympic Winter Games in Japan, he won three gold, six silver and four bronze medals.
- The development of Alpine Skiing among paraplegic and amputee athletes has been slower in Italy than in other European countries mostly because in Italy, in the post-war period, the rehabilitation centres didn't consider skiing as sport therapy.
- In addition, the lack of Italian producers of mono-skis (the special ski that allows paraplegic, tetraplegic and/or bilateral thigh amputees to ski in a sitting position) has made involvement in this sport more complicated for interested athletes.
- The first paraplegic athlete to win a medal in this class was Helmut WOLF. WOLF was a silver medallist at the Lillehammer 1994 Paralympics Winter Games in Norway in Downhill and Super-G, both fast disciplines that are traditionally the azure clad Italians' favourites and those in which the country has been most successful.
- In the 1980s and 1990s, WOLF popularised sitting skiing in Italy, while the first major medal in the standing class was won by Christian LANTHALER (ITA) at the 1991 World Championships.
- LANTHALER topped an outstanding sports career with two silver medals at the Salt Lake City 2002 Paralympic Winter Games in the USA.
- Today, Alpine Skiing is practised by the disabled all the way down the central Apennines and many centres offer the possibility of doing courses in skiing for the disabled.

-
- The sport is particularly popular in the Piemonte region at Sestriere and Valle d'Aosta, in the Trentino Alto Adige region at Val Gardena, in Lombardy at Livigno, Passo Tonale and Passo dello Stelvio, in the Friuli Venezia Giulia region, in the Veneto region, in Emilia Romagna, in Abruzzo and in Lazio. In all these places, it is possible to find ski instructors who are competent in working with people with disabilities.
 - The Italian Paralympic Committee (IPC), through its regional committees and sports societies, specialises in the discipline, holding qualified courses to implement and refine the sport's practice for all classes of disability.

COMPETITION DESCRIPTION

Paralympic competition format

The Torino 2006 Paralympic Winter Games Alpine Skiing competition takes place from March 11-19 at Sestriere Borgata.

The competition consists of the following 24 medal events:

Men:

- Downhill (standing, visually impaired, sitting).
- Super-G (standing, visually impaired, sitting).
- Giant slalom (standing, visually impaired, sitting).
- Slalom (standing, visually impaired, sitting).

Women:

- Downhill (standing, visually impaired, sitting).
- Super-G (standing, visually impaired, sitting).
- Giant slalom (standing, visually impaired, sitting).
- Slalom (standing, visually impaired, sitting).

Downhill

Skiers are timed as they race down a long, steep course that may include turns and jumps. They must pass through a number of gates that are used as checkpoints. The penalty for missing a gate is disqualification. Each athlete is allowed only one run down the course and athletes' times determine the order of finish.

Slalom

The course is shorter than other Alpine Skiing events with 55-75 gates on a men's course and 40-60 on a women's course that the athletes must negotiate. The penalty for missing a gate is disqualification. Each athlete completes two runs on the same day on different courses. Times from the two courses are combined to determine the order of finish.

Giant slalom

In comparison to the slalom, the course is longer, there are fewer turns, and the turns are wider and smoother. The number of gates is determined by the vertical drop, and the penalty for missing a gate is disqualification. Each athlete completes two runs on the same day on different courses. Times from the two courses are combined to determine the order of finish.

Super-G

The super-G is a speed event. The course is shorter than the downhill but longer than the giant slalom and slalom. The number of gates is determined by the vertical drop, with a minimum of 35 direction changes for men and 30 for women. Gates are set at least 25 m apart and the penalty for missing a gate is disqualification. Each athlete is allowed one run down the course. Athletes' times determine the order of finish.

Classification system

- Unique to the Paralympics is the classification system that enables athletes to compete on an equal level. All athletes compete with a pre-determined degree of disability. Classification is based on the functional abilities of competitors according to the degree and type of disabilities.
- Competitors with similar disabilities compete against one another in the same class in a given event. Winter sports are largely divided into three categories: LW classes (LW stands for locomotor winter and represents competitors with locomotive disabilities), sitting LW classes and B classes (competitors with visual impairment).
- Classification is determined by classifiers authorised by the International Paralympic Committee (IPC). Classes will be combined when there are too few competitors per class. The classes will be combined within the categories standing LW1-9 classes, sitting LW10-12 classes and B classes.
- When classes are combined, a percentage system will be used to determine results, taking the actual time and multiplying it by a percentage based on the competitor's class. Combined classes will be determined at the team captains' meetings held before the competition.
- Visually impaired athletes (B1-3) start first, followed by the sit-ski athletes (LW10-12) and the standing athletes (LW1-9).
- The order in which the individual events within these three categories will be run is determined by jury decision on the day of competition. Within each class, the start order for the first run is according to the draw held at the team captains' meeting on the evening before the event.
- If, based on jury decision, there are sufficient athletes in any one event in the slalom and giant slalom, the bottom 20 per cent of the athletes who finish the first run will be eliminated from the second run.

Differences between Olympic Winter Games and Paralympic Winter Games

The Paralympic courses' vertical drops are less than at the Olympic Winter Games. Multiple jumps and multiple compressions must be eliminated, where practical, for sitting and visually-impaired athletes.

Changes since the Salt Lake City 2002 Paralympic Winter Games

The IPC has sanctioned a change in disabled Alpine Ski racing to reduce races from 12 classes to three disabled categories: stand-up, sitting (mono-ski) and blind. This change increases the competition in each event, with the same number of skiers competing for fewer medals. The factors for this system were calculated from historical race results in order to fairly assess the relative performances of skiers in each of the categories.

General rules

The Alpine Skiing competitions will be held in accordance with the International Paralympic Sport Federation (IPSF), IPC and International Ski Federation (FIS) rules. In case of a disagreement in the interpretation of the rules, the English version shall prevail. Any questions or incidents not covered by the rules will be handled as follows:

- Cases of a general nature will be resolved in accordance with the IPC Alpine Skiing Rule Book (November 2004) and the IPC Handbook valid at the time of the Games.
- Technical issues will be resolved by the Competition Jury in accordance with the sport rules.

Time calculation

In general, each racing time of an athlete is multiplied by the factor of his/her respective class. This results in a factor-time or scoring time for each athlete within a category. In races with two heats/runs, the scoring times of both races are combined. The categories for men and women are:

- Blind skiers B1-B3.
- Sitting skiers LW10-LW12.
- Standing skiers LW1-LW9.

Race results

- Per gender, athletes are evaluated within the three categories (blind, standing, sitting) and applying the appropriate factor. The racing time is multiplied with the disability factor, leading to the ranking of the athletes by scoring time.
- For example, within the visually-impaired category, the class for totally blind skiers (B1) in one particular race might have a factor of 0.65; in the same race, the class with a lesser visual impairment (B3) has a factor of 1. This means that the B1 skier needs to ski 65 per cent as fast as the B3 skier in the same race to be ranked equal in the competition.
- Each competitor's actual race time is multiplied by the factor assigned to his/her class. The athlete in each class or group of classes with the fastest adjusted time is awarded a gold medal.

Special rules for blind athletes

- In all B-classes, the competitor and his guide are a team. Therefore, visually-disabled competitors and their guides will be trained and entered by their National Paralympic Committee or recognised FIS National Ski Association.
- For all B-classes, the use of a guide is obligatory.
- Guidance must be by voice and/or radio communication. Voice amplification between guide and competitor is accepted. No other means of communication is allowed during Alpine races.
- No physical contact between the guide and competitor is allowed during the race.
- All competitors in class B1 must wear blacked-out goggles during the competition. The model of the blacked-out goggles is optional, but they must be tested and passed by the jury.
- Competitors and their guides are permitted to sideslip or snow plough at low speed, through the gates, during the official inspection, if approved by the jury.

Guides

- The guide must guide the athlete from in front for B2 and B3. For B1 the guide can guide from in front or behind, passing between the last gate and finish line is allowed.
- The distance between guide and athlete in technical events (slalom and giant slalom) must not exceed two direction changes; in speed events (downhill and super-G) it must not exceed one direction change. Failure to satisfy this definition of the team will lead to disqualification.
- The guide must pass through all gates.
- All guides must wear competition bibs.
- The front of the bib must have the letter G printed in black (to denote their status of guide) and it must be a fluorescent colour.

- The front of the guide bib must not be covered during competition; however, the back may be a different colour to accommodate the needs of the visually impaired competitor.
- In the event of a guide's injury or illness, the athlete is permitted to change his/her guide. Such changes must be approved by the jury.

Tie-break rules and procedures

There are no tie-break rules and procedures. Skiers who have identical accumulated finish times share their rank.

Penalties and disqualification

There are no penalties. Disqualification rules are defined in the IPC/FIS rules. The disqualification of each competitor has to be confirmed by the jury. A competitor is immediately disqualified if both feet do not pass through each gate or if a gate is missed. In sit-ski competition, the entire ski must pass the gate line from tip to tail.

Protests and appeals

A classification protest has to be lodged within the official protest time. The effect of a classification protest/change will be for the next race of the athlete concerned. A technical protest is considered if submitted in writing no later than 15 minutes after the end of the competition to the jury members and is accompanied by a deposit of 100 Swiss francs.

Starting order

Starting order for categories for slalom is: blind, standing, sitting.

Starting order for categories for giant slalom, super-G and downhill is: blind, sitting, standing.

Start groups

The starting order of the competitors in all alpine competitions is determined by their Alpine Skiing Disabled Points (ASD-Points) as follows:

- For more than 25 athletes in one category, a starting group of 15 is used.
- For 16-24 athletes, a starting group of 10 is used.
- For 11-15 athletes, a starting group of seven is used.
- For 7-10 athletes, a starting group of five is used.
- For 6 and less, a starting group of three is used.

Within the first group of each competition, the draw will be random.

Starting order for the second run

If 120 or more starters are on the start list (first run) in slalom and giant slalom, 80 per cent of athletes from the results of the first run per category (rounded up) qualify for the second run.

Time-limit second run

Only athletes whose corrected time is less than double that of the category leader qualify for the second run.

Starting interval

The start can take place in each discipline at variable intervals. The chiefs of timing and calculation or special assistants tell the starter when each competitor should start, in agreement with the jury. The competitor on the course does not need to cross the finish before the next competitor starts. The exception is the B1 class which must have nearly completed the course before the next competitor is allowed to start.

Clothing and equipment

Advertising on material and equipment worn during the IPC Paralympic Winter Games and other IPC-sanctioned competitions must conform to the IPC Manufacturing and Trademark Guidelines.

Skis

The skis used in Alpine Skiing events are long and narrow. Men's skis are a minimum of 155 cm long and women's skis are a minimum of 150 cm. The minimum height of the shovel tip is 50 mm in slalom and giant slalom events, and 30 mm in downhill and super-G events.

Sit-skis

Some athletes with a physical disability compete from a sitting position using a sit-ski, also called a mono-ski. Mono-skis have a specially fitted chair over a single ski. The chair includes seat belts and other strapping, as well as a suspension device to minimise wear and tear on the skier's body.

Poles or outriggers

Skiers use poles for propulsion and balance. The poles for downhill and super-G events are curved to fit around the body. Slalom poles are straight and usually have plastic guards to protect the hands from injury. Athletes in certain Paralympic classifications (for example, single-leg amputees who ski without a prosthesis, sit-ski users) use special poles called outriggers. Outriggers have short ski blades on the end and help the skier with balance.

Boots and bindings

Boots have a hard plastic exterior with extensive foot and ankle support. Boots used in the speed events (downhill and super-G) have a greater incline at the ankle than boots used in the technical slalom events. The heel height of boots is regulated, with a maximum distance of 50 mm between the sole and the heel for men and 45 mm for women. Alpine skiers use bindings that attach at both the heel and toe.

Helmets

Hard-shell helmets are required.

Goggles

Goggles are used to protect the eyes and to maximise visibility.

Clothing

Alpine ski races wear light-weight, form-fitting clothing (all in one suit) to minimise air resistance. Slalom skiers frequently wear pads to offer protection from injury.

Glossary

Adjusted time

A percentage factor is assigned to each class. For example, within the visually impaired category, the class for totally blind skiers (B1) may have a factor of 0.65; in the same race, the class with a lesser visual impairment (B3) has a factor of 1. This means the B1 skier needs to ski 65 per cent as fast as the B3 skier in the same race to be ranked equal in the competition. The athlete in each class or group of classes with the fastest adjusted time is awarded a gold medal.

Boards

Skis.

Bucket

The seat portion of a mono-ski.

Fall line

If a ball were dropped on a ski run, the fall line is the fastest route it would take to the bottom. The term 'line' is used to refer to the path racers take down the course.

Gates

Alternating red and blue gates are used to mark the course a skier must follow down the hill. Each gate is a plastic pole, designed with a spring at the base, that bounces back when a skier knocks it down. If a gate is missed or both skis do not pass through each gate, the competitor is disqualified. In sit-ski, the entire ski must pass the gate.

Mono-ski

Constructed by attaching a fibreglass seat to a single ski with a shock absorber, a mono-ski allows skiers to glide down a hill in a seated position and requires outriggers to help retain balance. There are no competition specifications because the equipment is still evolving. Many athletes make their own equipment for a custom fit.

Outrigger

An outrigger is a forearm crutch that has a small spring-loaded ski on the end. Some competitors use outriggers instead of poles for balance.

Roller

A large bump in the ski terrain. Sometimes called a roll or rollover, it is a common place for competitors with a lot of speed to catch air.

Sit-ski

A toboggan-like ski for sit-down skiers who choose to ski closer to the ground or those with injuries that do not allow them to use a mono-ski.

QUALIFICATION CRITERIA

Participation

- Only those National Paralympic Committees (NPCs) recognised by International Paralympic Committee (IPC) may enter competitions in the Paralympic Games.
- The qualification is attributed to the NPC not to the athlete.

Athlete eligibility

Athletes must:

- Hold a valid IPC Alpine Skiing Disabled (ASD) licence for the 2005-06 season.
- Be at least 15 years old by February 23, 2006.

And for technical events:

- Be ranked and have 160 Alpine Skiing Disabled (ASD) points or less on either the ASD Slalom or Giant Slalom Ranking Lists as of February 23, 2006.

And for speed events:

- Be ranked and have 160 ASD points or less on either the ASD Downhill or Super-G Ranking Lists as of February 23, 2006.

Qualification system

- The quota qualification system is applied separately for men and women.
- Any reference which follows to ranking lists or athletes that does not specify gender applies to both genders.

Sport specific wild cards

- Each NPC considered by IPC Alpine Skiing to be widely and regularly practicing Alpine Skiing that has one or more athletes on the ASD Combined Ranking List closing April 30, 2005, but that does not have an athlete holding 160 ASD points or less, will receive one male qualification slot and/or one female qualification slot.

Ranking factor determination

- The total number of athletes that have 160 points or less on both the men's and women's ASD Combined Ranking Lists closing April 30, 2005, will determine that NPC's 'qualification base' for each gender.
- Each NPC's qualification base divided by the total number of athletes (all NPCs) that have 160 points or less on the men's and women's ASD Combined Ranking Lists closing April 30, 2005, will determine the NPC's 'qualification factor' for each gender.

Quota allocation

- The NPC's qualification factor multiplied by the total number of available men's qualification slots 170 less the sport specific wild card slots allocated and women's qualification slots 80 less the sport specific wild card slots allocated will determine the NPC's 'qualification slot quota' for each gender.
- The quota will be rounded to the nearest whole number.

Discretionary slot allocation

- IPC Alpine Skiing may allocate any of the remaining qualification slots provided that the NPC's maximum quota has not been exceeded and has eligible athletes at the time the slots are allocated.

Athlete quota

- Men 170.

-
- Women 80.
 - Total 250.

NPC quota

- Each NPC can be allocated a maximum of 20 qualification slots for men and 10 qualification slots for women.
- An NPC can enter a maximum of five qualified athletes per event per class.

Reallocation of unused qualification slots

- Any qualification places earned that are unused (i.e. in the instance of a non-reply or officially returned by an NPC through written correspondence) may be reallocated by IPC Alpine Skiing through the discretionary slot allocation method.

CLASSIFICATION RULES

Athletes from the following athlete groups may compete in Alpine Skiing at a Paralympic level.

Amputee	V
Cerebral Palsy	V
Intellectual Disability	x
Les Autres	V
Spinal Injuries	V
Visually Impaired	V

The Alpine Skiing classification system is divided into three (3) overall categories, as follows:

Visually Impaired	B1, B2, B3
Standing	LW1 - LW9
Sitting	LW10 - LW12

There are three (3) sport classes for athletes who are blind, partially sighted or visually impaired, B1, B2, and B3. Athletes may compete with a sighted guide or verbal guidance.

B1 Class

- Athletes are considered totally blind, or have no usable vision
- Athletes range of vision is from no ability to distinguish between light and dark to some light perception
- Athletes are unable to recognise shapes (ie, they are unable to recognize the shape of a hand at any distance or in any direction)

B2 Class

- Athletes are partially sighted but with little remaining sight, referred to as low vision
- Athletes can recognize the shape of a hand
- Ability to see clearly will be 2/60 (2/60 means the athlete can see at 2m what a person with normal vision sees at 60m) and/or a very small visual field of less than 5 degrees (20 degrees is considered normal and comparable to looking through a peephole in a door)

B3 Class

- Athletes are partially sighted with the greatest amount of remaining sight of the three (3) sport classes, referred to as visually impaired
- Athletes have visual acuity from 2/60 to 6/60 and/or visual field of more than 5 degrees and less than 20 degrees

There are seven (7) sport classes for athletes who ski while standing. Athletes in these sport classes have decreased range of movement, weakness or poor co-ordination in their legs and trunk and compete using a wide variety of equipment.

LW1

- Athletes have severe impairment in both legs (ie, double above-knee amputation)
- Included are athletes from the Cerebral Palsy athlete group who are unable to remain still because of continuous slow and flowing involuntary (athetosis) and athletes with severe impairment in both legs (diplegia)
- Examples of equipment used: skiing with two (2) outriggers and two (2) skis; skiing using two (2) outriggers, one (1) ski and a prosthesis attached to a ski

LW2

- Athletes have severe impairment of one (1) leg such as single above-knee amputation

- Examples of possible equipment used: one (1) ski and two (2) outriggers, stabilizers or ski poles

LW3

- Athletes have impairment of both legs, but not as severe as LW2 sport class
- Included are athletes with double below-knee amputations and athletes with cerebral palsy with moderate to slight impairment in both legs (diplegia)
- Examples of possible equipment used: two (2) skis and two (2) poles or stabilizers. Also, amputees use a prosthesis

LW4

- Athletes have impairment of one (1) leg, which includes athletes with single below-knee amputation or a fused joint (ie. hip or knee).
- Examples of possible equipment used: two (2) skis and two (2) poles, and amputees also use a leg prosthesis

LW5/7

- Athletes have impairment of both arms or both hands that prevents use of ski poles
- Included are athletes with bilateral arm amputation or paralysis of both arms
- Examples of possible equipment used: two (2) skis without ski poles. Athletes may choose to compete using an arm prosthesis

LW6/8

- Athletes have impairment of one (1) arm or hand who use one (1) ski pole
- Included are athletes with a single arm amputation or paralysis in one arm
- Examples of possible equipment used: two (2) skis and one (1) ski pole. Athletes may choose to compete using a prosthesis or an orthosis

LW9

- Athletes have range of impairment on one (1) side of the body
- This sport class is further divided into two (2) sport classes
 - LW 9/1: Included are athletes with amputation of one arm and one leg
 - LW 9/2: Included are athletes with cerebral palsy who have paralysis or weakness on one side of the body (hemiplegia)

There are three (3) sport classes for athletes who compete while sitting. Athletes may have impairment in their arms, legs and trunk and compete using a mono-ski or sit-ski.

LW10

- Athletes have impairment in both legs and trunk
- Athletes have no sitting balance and require special straps and seating for stability
- Includes athletes from the Spinal Cord Injury athlete group (tetraplegia and paraplegia) and the Cerebral Palsy athlete group with impairment in all four extremities (tetraplegia).

LW11

- Includes athletes with less impairment in the legs, hips and trunk than in LW10
- Athletes have a small amount of sitting balance (referred to as fair sitting balance)
- A wide range of athletes from several athlete groups are in this sport class including spinal cord injuries (paraplegia), cerebral palsy (diplegia) and amputation (double above-knee amputation).

LW12

- Included are athletes with the best function in their legs and the best sitting balance (referred to as good sitting balance)
- The class is further divided into two sport classes
 - LW12/1: Athletes who have the least amount of paralysis in the legs (paraplegia) and good sitting balance
 - LW12/2: Athletes with double above-knee amputations and good sitting balance

COMPETITION SCHEDULE

Date	Time	Event
WED 8 MAR	11:30	Women's Downhill - Stand - 1st Trng Run
WED 8 MAR	-	Men's Downhill - Standing 1st Trng Run
WED 8 MAR	-	Women's Downhill - Vis Imp 1st Trng Run
WED 8 MAR	-	Women's Downhill - Sitting 1st Trng Run
WED 8 MAR	-	Men's Downhill - Vis Imp - 1st Trng Run
WED 8 MAR	-	Men's Downhill - Sitting - 1st Trng Run
THU 9 MAR	11:00	Women's Downhill - Stand - 2nd Trng Run
THU 9 MAR	-	Men's Downhill - Standing 2nd Trng Run
THU 9 MAR	-	Women's Downhill - Vis Imp 2nd Trng Run
